Application Review

Our recruiting team kicks off the process by reviewing your resume and credentials. You'll hear from one of our recruiting team members if we think you are a good fit for the position, and we'll set up some time to chat.

Interview

How long will this take? On average, 2-4 weeks, depending on schedules.

Who will I meet? This varies per department, but we make sure you'll meet with potential peers, manager, and possibly an executive.

What is the process? These are pretty generic guidelines, and processes may vary from role to role. In a nutshell, you can expect a combo of 1-2 phone interviews, 1-2 on-site interviews, and something like a coding assignment or case study.

Interview survey

We will send you a post-interview survey so that you can rate how we're doing. Your feedback is important to us, as we're constantly looking to improve our interview process and the candidate experience.

1 Grow smarter every day

Be productive at work, express oneself clearly and get to know the culture and business ethics – that are the topics we train our employees. Working with us you grow smarter every day.

2 Enjoy a growth perspective

Either you want to become a technical leader or switch to a management role we have 3-months-long career development program, a set of technical trainings on hot topics and our special deep-dives in particular technologies, and project management knowledge exchange group.

3 Have a direct access to clients

Have a business trips to our clients onsite and or get hired directly if you build productive and trustful relationship. Every 6th person at Proectus traveled onsite to a client accounting for a 17% rate from all of the employees.

Our clients hired directly and helped to move to their offices 5% of the company employees lead teams in engineering and operations.

4 Experience real work-life balance

From work-life balance to work-life augmentation is the mentality we promote. We create great environment for staying at work and having fun, doing sports and building meaningful relationships.
