EXTRUSION LINES – ENGINEERED TO PERFORM ▶

▶ **FLEXIPET –
TWIN SCREW EXTRUSION**

**Extrusion lines –
engineered to perform**

One line, many options

SML's FlexiPET represents an exceptional twin-screw extruder concept that is easily adaptable to various polymers. This line is able to process virgin and regrind PET, PP and PS – material switches can be managed very quickly. FlexiPET is also versatile regarding the choice of winding systems.

Key Features

- Designed for the highest flexibility to process different kinds of polymers and applications
- Recommended for the use of PETG and its post industrial flake stream
- Optimised to use dusty material streams
- FlexiPET lines are highly flexible in terms of useable materials and combinations
- The lowest residence time inside the extrusion unit due to conical twin screw extruders
- Reduced energy consumption
- Minimised applied shear stress

BASIC DESIGN INCLUDES

- ▶ Material dosing and conveying system for twin screw extruders (2 main + 2 side components)
- ▶ Complete extrusion unit with a conical twin screw, backflush filter, melt pump and static conical mixer
- ▶ FlexiPET 4 and below: manual die / FlexiPET 5 and up: automatic die
- ▶ Roll stack with SPG roll technology, temperature control unit, hydraulics and safety devices
- ▶ Thickness gauge
- ▶ Edge trim unit with blade knives and an edge trim mill
- ▶ Winder W501
- ▶ Automatic control system
- ▶ SML BitWise System

OPTIONS

- ▶ Inline liquid antiblock application device
 - ▶ One shaft winding unit with two webs up to a certain width
 - ▶ Inline PE lamination
 - ▶ Upgrade of take-off units for optically sensitive sheets
 - ▶ Inline sheet inspection system
 - ▶ Inline edge trim recycling system (from the mill directly to bin and further to the extruder)
 - ▶ Simplified predrying of flakes in front of the main extruder
 - ▶ Predrying of virgin for coextruder
 - ▶ Optional: single screw instead of twin screw coextruder
- Extruder Combination: FlexiPET 1+2 = 60/28
FlexiPET 3-8 = 90/33

The bright variety of SML's technology

PET sheet products are primarily used for food and consumer goods like trays, cups, blisters and lids. In addition, pharmaceutical and medical products have become important areas of application.
